18kw

▶ Ride Time  
3 - 4 hours Enduro Trail  
45min - 1 hour Track or MX

EBMX has designed and are producing the best SurRon Light Bee batteries worldwide. Our batteries are manufactured with NMC pouch cells that are fully potted inside of stainless-steel cases. The result, is a battery with less internal connections, higher charging and discharging rate, as well as. significantly higher power density (increased power in a smaller space).

With a new injection molded top cap and available exclusively with EBMX, choose from 72v42ah standard or 72v42ah QS8 Race version. These batteries are optimised for more power and keep the stock motor cooler while riding hard.

**RETAIL CUSTOMERS:** These batteries are Class 9 Dangerous Goods and are shipped out of China to your local dealer, they are not for retail sale on our website; to order an EBMX Battery please contact a EBMX Dealer or Reseller in your country or email [sales@ebmx.com](mailto:sales@ebmx.com) for assistance.

Pair with the EBMX X-9000 Controller Kit and XLB-60 motor for the ultimate power upgrade. An EBMX 72v Charger is required for these batteries.

Our SurRon batteries sit higher than the stock battery so they come with an extended battery clip to ensure you can still latch the stock cover.
