5 hours Enduro Trail  
2 hours Track

EBMX has designed and are producing the best SurRon Ultra Bee batteries worldwide. Our batteries are manufactured with NMC pouch cells that are fully potted inside of aluminium steel cases. The result, is a battery with less internal connections, higher charging and discharging rate, as well a significantly higher power density (increased power in a smaller space).

With a new injection molded top cap and available exclusively with EBMX,. These batteries are optimised for more power and keep the stock motor cooler while riding hard.

**RETAIL CUSTOMERS:** These batteries are Class 9 Dangerous Goods and are shipped out of China to your local dealer, they are not for retail sale on our website; to order an EBMX Battery please contact a EBMX Dealer or Reseller in your country or email [sales@ebmx.com](mailto:sales@ebmx.com) for assistance.

Pair with the EBMX X-9000 Controller Kit and XUB-80 motor for the ultimate power upgrade. An EBMX 92v Charger is required for these batteries.

Our SurRon Ultra Bee batteries sit higher than the stock battery, so they come with a proprietary battery lid to ensure you have a perfect fit.
